

Enhanced Oil Recovery (EOR) Polymer Flooding Package

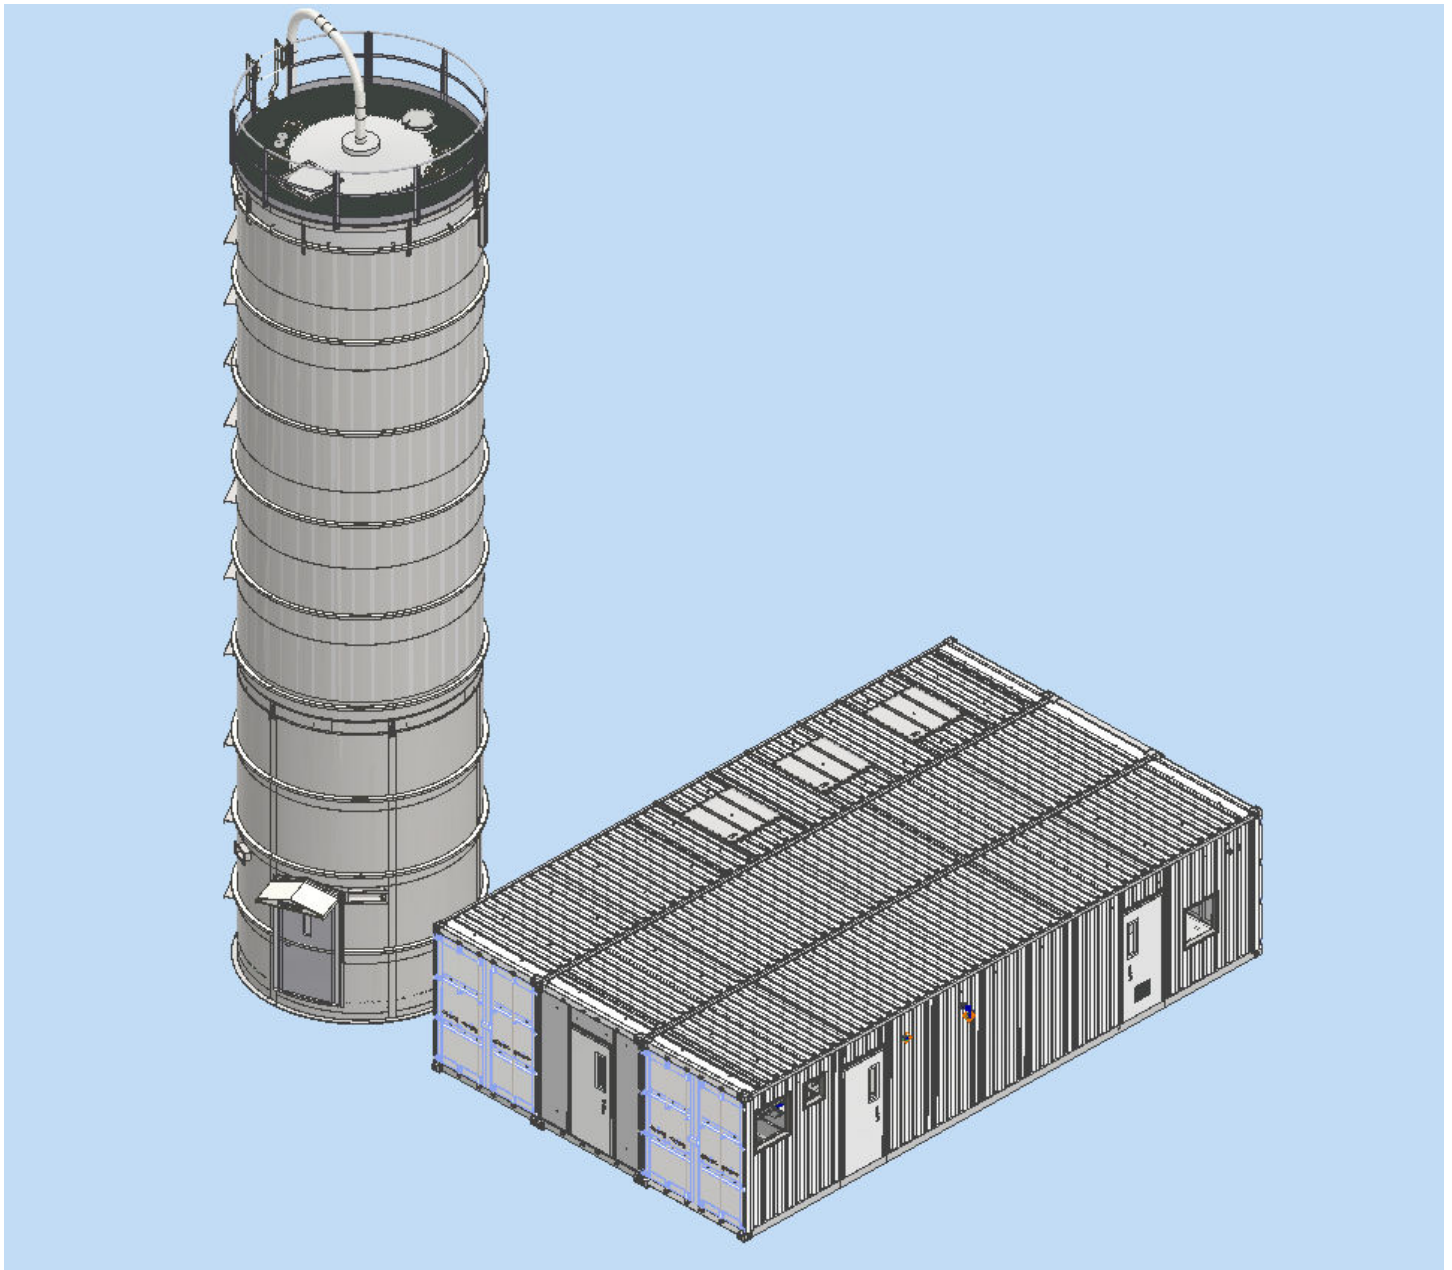

Oil & Gas Client

Enhanced Oil Recovery (EOR) Polymer Flooding Package

Oil & Gas Client

BACKGROUND

ClearBakk was approached by an Oil & Gas client in Alaska to design a polymer hydration package to extract more oil from their reservoir. We designed and built a 4.8 MT/day Chemical Enhanced Oil Recovery (cEOR) package in 5 months from PO to ready to ship status, which met our clients accelerated delivery schedule. The package was delivered to the Alaskan North Slope following construction.
